\$FLO

\$ is FLO cryptocurrency
is tokens created on FLO

**This presentation will be about
\$FLO, mining#, and rupee#**

What Is A Cryptocurrency Exchange?

An online platform that allows you to buy and sell cryptocurrencies.

Why Do We Need A Crypto Exchange?

You can not buy Bitcoin, Ethereum, FLO or any other cryptocurrency from your country-based banks. To buy a cryptocurrency you need to register yourself on a crypto exchange.

How Do They Operate?

You need to buy a cryptocurrency using your nation's fiat currency. Do a KYC, deposit some fiat balance, and buy your choice of digital assets. Sell them to trade and make profits.

How Does The Price Mechanism Work?

You buy some cryptocurrency, and believe that their price will go up and you can make profit selling them at a higher price.

Large volume selling or buying can impact the price on exchange. Unreliable or scammy crypto coins always end up pumping and dumping the market.

How Is RanchiMall Exchange Different?

Only selected crypto assets will be listed where real development is going on. We develop architecture on FLO blockchain, so only FLO and FLO-based tokens will be listed.

Only high-rated FLO IDs will be allowed to trade. A good system is run by good people with good faith. We do it via FLO ID based rating.

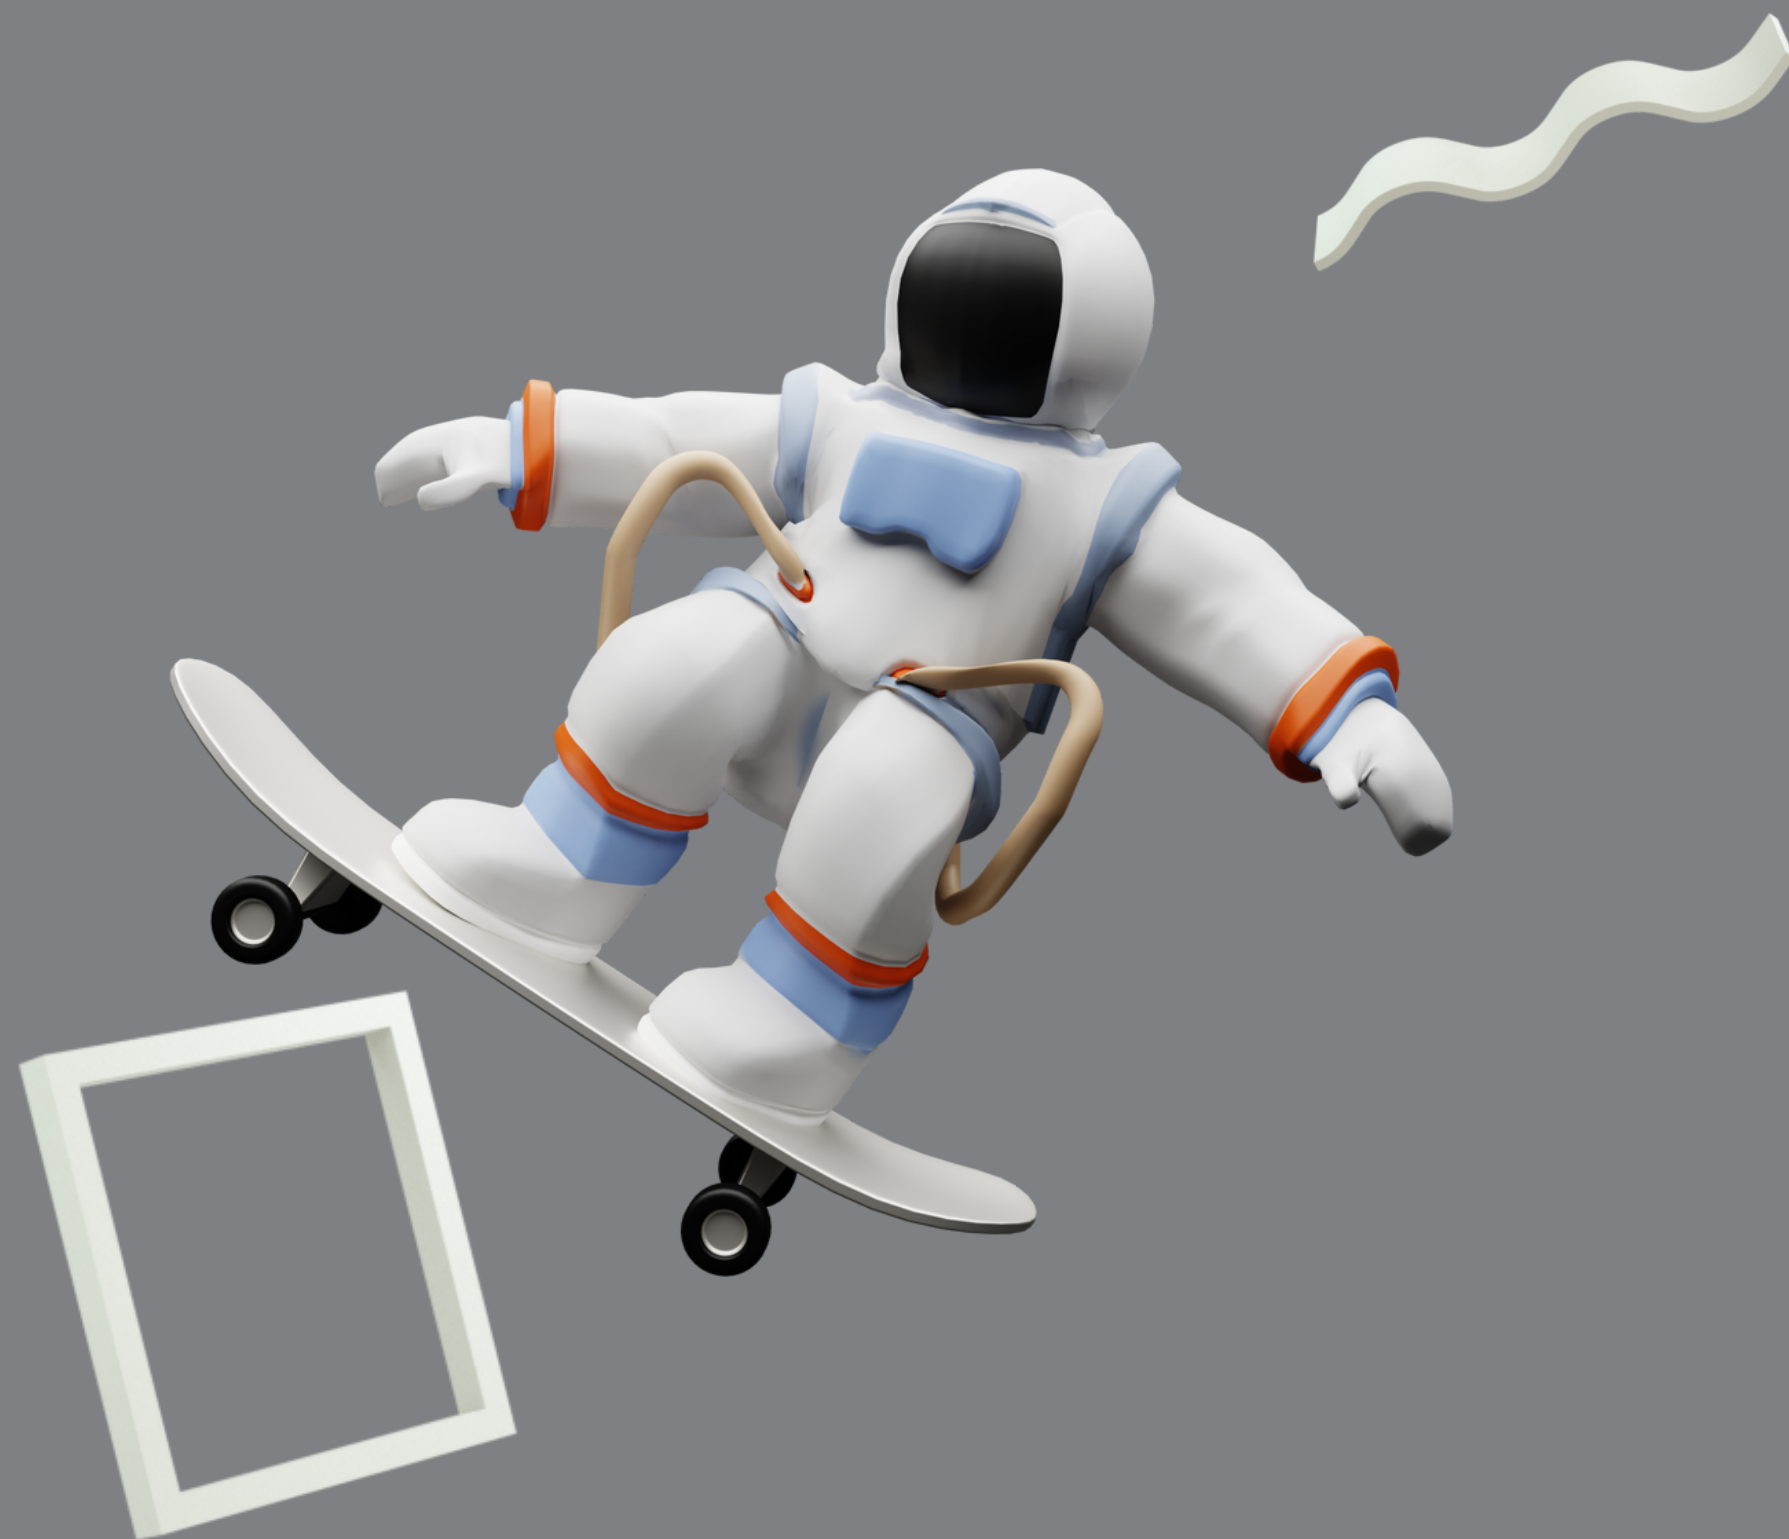

Let's start with \$FLO

how to trade it on RanchiMall Exchange

To enable the ecosystem of trading, we will start with
Launch Sellers & Launch Buyers and then move to the public

Launch Sellers

On a first come first serve basis 5 users will be selected for selling \$FLO in the exchange for a guaranteed profit.

.....

Other than first come first serve, we also seek people with good faith and a proved long-term believer in RanchiMall.

Launch Seller Package and Incentives

1

Sell \$FLO of Worth Minimum 5 lakh Rupee#

2

Guaranteed Arbitrage Opportunity

3

No Long-Term Lock-in

Launch Seller Package and Incentives

4

Immediate Cashouts

5

Priority in Selling Over Everyone

6

International Market Price: USD 0.016
Our Exchange Price: USD 0.026 = INR 2

All gains go to the launch seller

Sell \$FLO of Worth Minimum 5 lakh Rupee#

You are promised guaranteed advantages, hence we expect certain selling/buying behavior from you at launch.

You must sell \$FLO of worth a minimum of 5 lakh rupee#

You need to first buy \$FLO of worth USD 6,621.34 (equivalent to INR 5 lakh) from Bittrex Exchange, which will be worth 0.143 BTC.

Sell on our exchange at USD 0.026 i.e INR 2.

Guaranteed Arbitrage Opportunity

Arbitrage is a technique of gaining from differences in the price of crypto in different markets.

You buy FLO at USD 0.016 on Bittrex Exchange.

You sell FLO at USD 0.026 on RanchiMall Exchange.

No Long-Term Lock-in

Though we believe in long-term players, there is no boundation for our Launch Sellers.

Sell and cash-out your profit immediately.

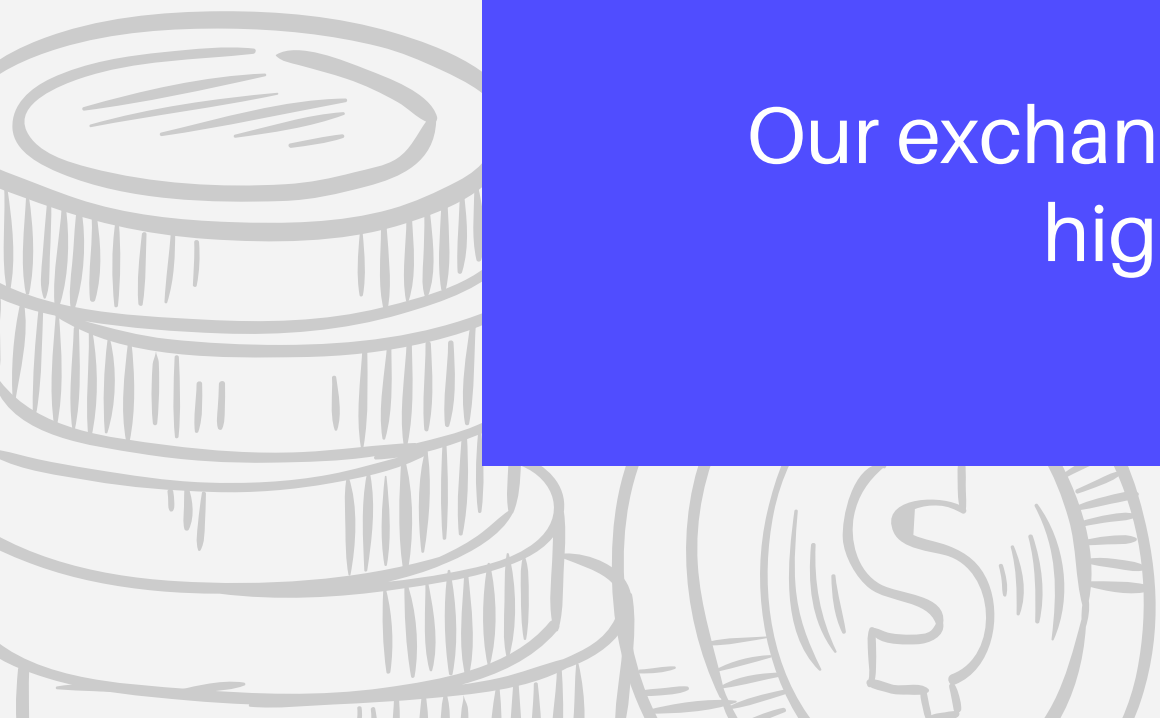

Priority in Selling Over Everyone

Launch users are selected to enable the system.

Once more traders join the exchange, Launch Users will still have the highest priority over other users.

Our exchange follows priority-based trading. Orders from the highest rated flo addresses will execute first.

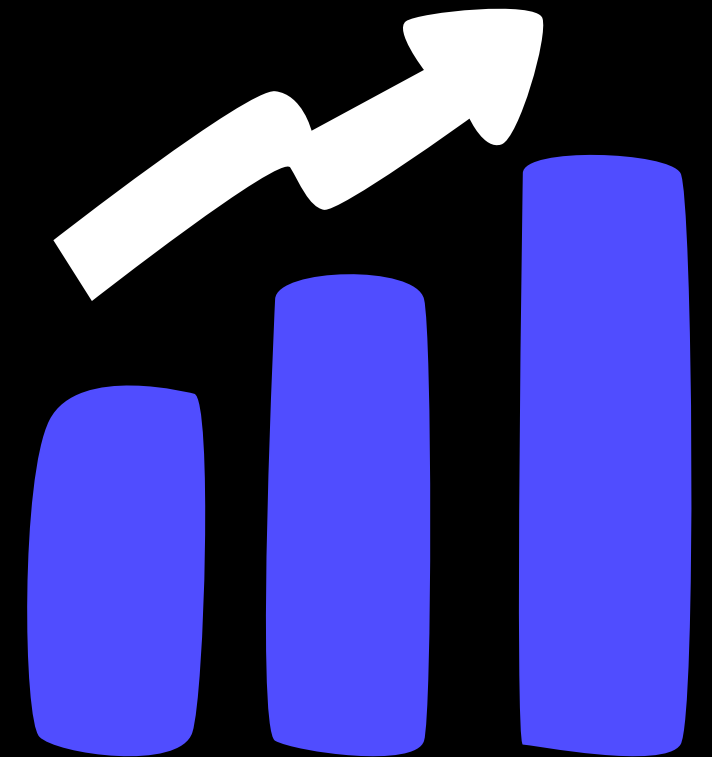

You Can't Sell At Loss

Our exchange follows rules to avoid Pump and Dump schemes

Price goes up by 0.5% every hour if more buyers

Price goes down by 0.2% every hour if more sellers

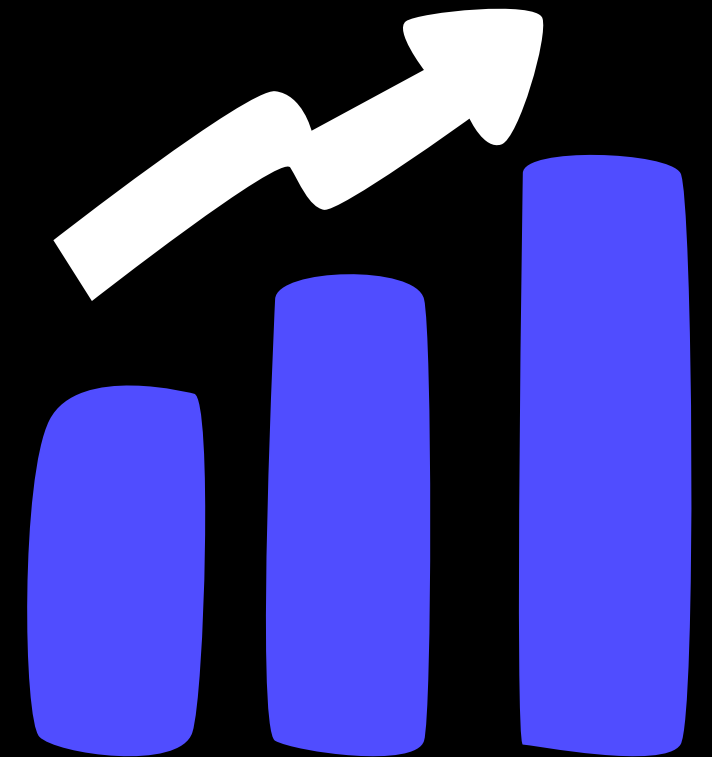

Some Rules Before You Start

You must first buy from our exchange in order to sell

High-rated FLO addresses will be given priority

Rather than an open order book, our exchange follows algorithmic price pattern

Launch Sellers Will **Enable** **Trading** In Exchange Market

After that it will be open for normal users. RanchiMall Exchange will always operate on priority based sellers and buyers.

What is Priority Based Trading?

For Launch Sellers Priority Will Be The Highest

For normal users priority will follow this ladder:

SUPER ACTIVE INVESTORS
SUPER ACTIVE EMPLOYEES
SUPER ACTIVE INTERNS
SUPER ACTIVE MINERS

Any other user will come after this.
We give priority to our community.

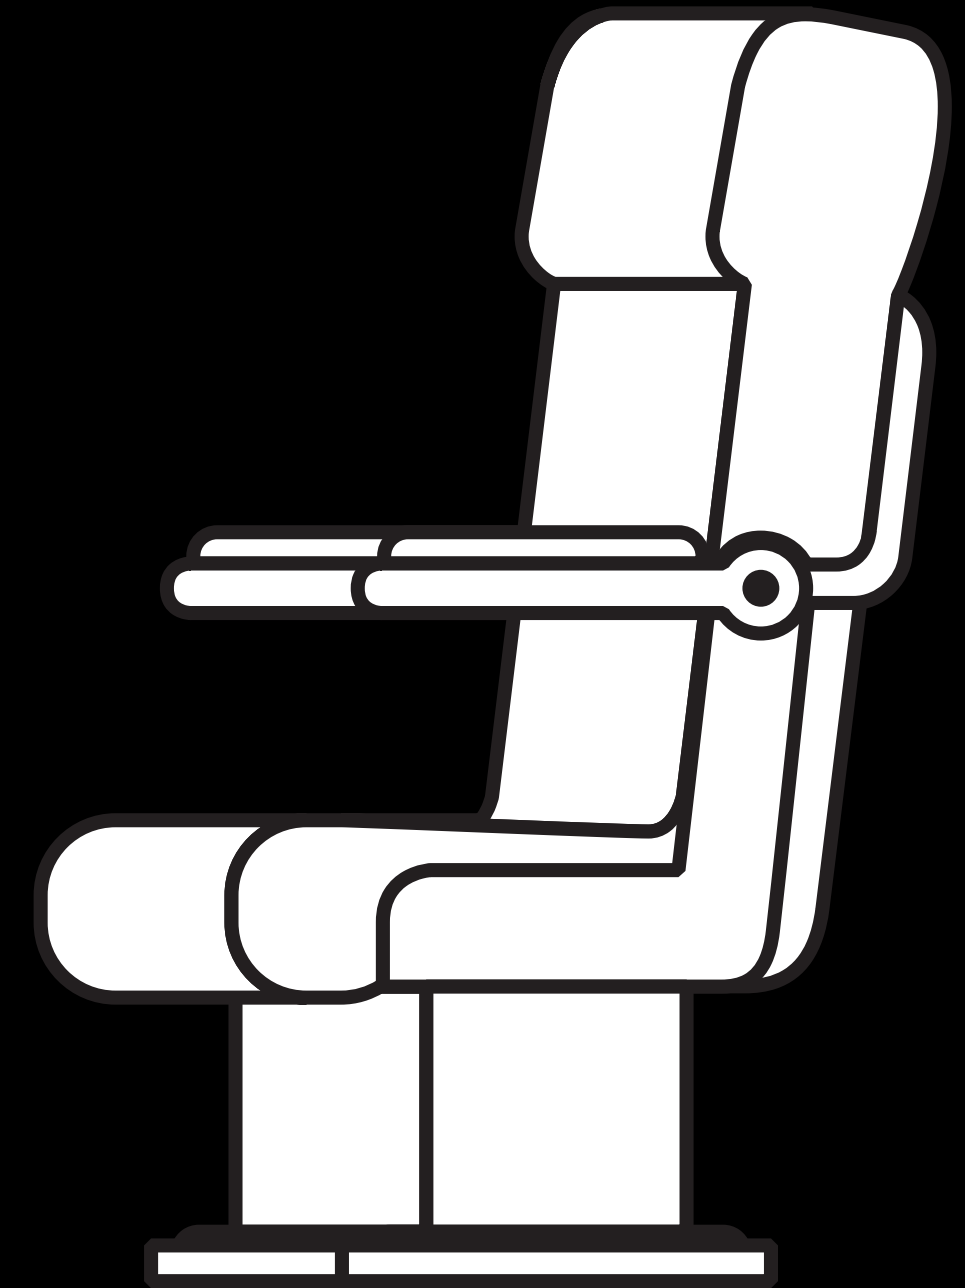

Onboarding

We have the simplest approach to buy or sell \$FLO or any other FLO-based token.

EASE OF USE

- No need to install any crypto wallet ←
- No email address is required ←
- No registration ←

only a FLO ID + PRIVATE KEY

The Process

Rupee#

Rupee# is not a Stable Coin. It is created as a footprint of INR so we can record the transactions for our Indian users on the blockchain.

Rupee# operates as a medium to deposit balance as an equivalent to INR and then it can be used to buy other FLO-based tokens on our Exchange.

Rupee# is for Indian users who use UPI payment method, as we have linked it to the blockchain, which we call UPI ON BLOCKCHAIN.

Rupee# to your FLO ID can be deposited using the UPI ON BLOCKCHAIN app. The value of 1 Rupee# will always be equivalent to 1 INR.

The same process goes for all tokens

Launch Sellers get FLO from the international market to trade it in RanchiMall Exchange.

RanchiMall Miners get Mining# from their mining shares.

floBNB Guests along with Investors and Producers get the floBNB#

Launch Buyers

Launch Buyers will also be selected people from our community to enable and start the system.

ENJOY TRADING AT NO LOSS
